

Application No. 09/324,249
Amendment date: March 3, 2004
Reply to Office Action of December 3, 2003

Amendments to the Specification

Please replace the first full paragraph on page 7 of the specification, with the following amended paragraph:

B1

The delivery IP address may be saved in the wireless camera device memory in response to input commands entered at a device user interface, input commands entered remotely via the communications device, or input commands ~~stored in the portable device memory during manufacture of the wireless device.~~ The RF communications device may be a circuit-switched data modem or packet data modem, and may respectively establish a switched connection through the Public Switched Telephone Network (PSTN) to the server or to a host device and router system at a particular phone number from which messages are transmitted to the destination IP address, or may transmit the message directly through a cellular service provider digital packet network connection, such as CDPD, to the destination IP address through an Internet connection.
